

Filip Ilic

Computer Scientist

f-ilic.github.io filip@ilic.cc +43660 4201337
Graz, Austria Austrian Citizen

I am interested in the fields of computer vision, machine learning and data analysis.
During a potential PhD I would like to satisfy and persue my curiosity regarding spatiotemporal reasoning and deep convolutional networks, which was piqued during the course of my studies.

Professional Experience

Now – Apr 2019 | **Project Assistant - Inst. of Computer Graphics and Vision, Graz**
Researching spatiotemporal reasoning
PyTorch | OpenCV | Tensorflow

Mar 2018 – Feb 2017 | **Technical Student - CERN, Geneva**
Developing new quality monitoring tools, maintaining and extending libraries used at the CMS particle detector, which monitors particle collisions in the LHC.
- Extending and maintaining ROOT, a scientific high performance C++ library
- Developing and architecting internal tools for Data Quality Monitoring
- Big Data pre-processing

Full stack development | Python | C++ | Qt | PHP | JavaScript | Django | SQL | ROOT | Scikit-learn

Oct 2016 – May 2016 | **Developer - TUGraz & AR4, Graz**
Joint research project between industry and university.
C++ | OpenCV

Mar 2016 – Sep 2013 | **Mentor - Office for Gender Equality and Equal Opportunity, Graz**
Informing high school graduates about their academic options.
Soft Skills | Guided Tours

Teaching

2019 – 2018 | **Teaching Assistant - Inst. of Electrical Measurement and Measurement Signal Processing, Graz**
Laboratory supervision on advanced computer vision topics *(MSc level)*
MATLAB | Caltech Camera Calibration Toolbox

2015 – 2014 | **Teaching Assistant - Inst. for Computer Graphics and Vision, Graz**
Tutoring studens and grading assingments on computer vision basics *(BSc level)*
MATLAB | C++ | OpenCV

Education

2015 - 2019 MSc / Dipl.-Ing. in Computer Science, *Graz University of Technology*
2011 - 2015 BSc in Computer Science, *Graz University of Technology*

Presentations

2019 Combining Top-Down and Bottom-Up Processes to Extract Space-Time Volumes of Interest from Video
Computer Vision Winter Workshop (CVWW) 2019

Publications

2019 Extracting Space-Time Volumes of Interest from Video by combining Top-Down and Bottom-Up Processes
British Machine Vision Conference (BMVC) 2019 - **Submitted & Awaiting Acceptance Notification**

2019 Combining Top-Down and Bottom-Up Processes to Extract Space-Time Volumes of Interest from Video
MSc Thesis: Graz University of Technology, Austria - **Supervision Prof. Axel PINZ**

</> Skills

Programming languages	C++, Python, Javascript, Java, C, HTML5 & CSS, MATLAB, Haskell
Field related frameworks	OpenCV, PyTorch, Keras, Scikit-learn, Scikit-image, Pandas
Miscellaneous	Qt, Gtk, Django, RubyOnRails, Jekyll, SQL

Languages

- German
- English
- Serbo-Croatian
